NEW DELHI 3, (INDIA) ; }
The 29th August, 1949. }

S. P. JAIN,
for Registrar General, India.

NATIONAL
SAVINGS
CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in the Provinces of India and some of the Indian States for the week ending the 30th July 1949.

REMARKS

The figures of births and deaths shown in this statement for the week ending the 30th July, 1949, relate to 168 towns with an estimated population of 22,130 thousands. The total number of towns is 213 and their population is 25,943 thousands. Thus 79% of the total number of towns representing 85% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 13,834 and 8,291 representing birth and death rates of 32.5 and 19.5 per thousand of population respectively.

(A) *Indian Provinces*.—The data here relate to 156 towns with an estimated population of 20,714 thousands. Information from Bihar and Assam could not be included. The total number of towns is 189 and their population is 23,320 thousands. Thus 83% of the total number of towns representing 88% of the total population is covered. The number of births and deaths recorded in these towns were 12,908

and 7,762 representing birth and death rates of 32.4 and 19.5 per thousand of the population respectively. The table at the end gives the position by provinces :—

Guddiyattam in Madras was the only town which recorded a high death rate of 64.8 per thousand of the population. This high death rate was mainly due to the large number of deaths from cholera.

(B) *Unions and States*.—The data here relate to 12 towns with an estimated population of 1,416 thousands. The total number of towns is 24 and their population is 2,623 thousands. Thus 50% of the total number of towns representing 54% of the total population is covered. The number of births and deaths recorded in these towns were 926 and 529 representing birth and death rates of 34.0 and 19.4 per thousand of the population respectively. No town recorded a high death rate of 50 or over per thousand of the population.
